General situation update related to COVID-19

The SEC decision

Mar, 05, 2021

The vaccination campaign will be carried on involving workers in trade, public transport and taxi service sectors and secondary school teachers and staff beginning from March 15, Deputy Prime Minister and Head of the State Emergency Commission (SEC) S.Amarsaikhan reports today, March 5.

The Government of Mongolia has announced its goal to fully involve the adult population in vaccination by July 1. In frame of it, immunization work kicked off on February 23 to be organized at two phases.

“According to the plan, one million adult citizens who are working and living in Ulaanbaatar city, an epicenter of the coronavirus pandemic, will be vaccinated in March and April and local citizens living in green zone will be immunized in May and June,” the Deputy PM said.

Underlining the country's experience that vaccinated its 1.5 million adult population within 10 days through nationwide vaccination campaign when H1N1 virus spread in 2009, the Deputy PM stressed necessary equipment, infrastructure and personnel for the vaccination have been ensured.

Since the start of the vaccination, 15 thousand healthcare workers, police and emergency management officials have received the first dose of COVID vaccine. According to surveillance, over 40 percent of them have shown symptoms such as having a fever and headache after taking the vaccine. This means the vaccine is at permissible level to be used in inoculation for the population further as confirmed by scholars and researchers. Therefore, preparation is underway to organize the vaccination in a wider scope according to the plan, the Deputy PM highlights.

40 thousand workers of trade and service sector and 5000-7000 workers of public transport and taxi service will be vaccinated in the first place.

Furthermore, the Government and the SEC are planning to reopen secondary and high schools in the capital city from April 1 after making assessment on the situation. Therefore, it is being prepared to inoculate secondary school teachers and staff in vaccination as well. There are 45 thousand employees in education sector in Ulaanbaatar city while 25 thousand in rural areas.

Mar 05, 2021, at 11:00am Briefing by MoH

MoH, Head of Department, D.Narangereel,

NCCD, Head of Infectious Disease Surveillance department, J.Baigalmaa,

NCCD, Director of Immunization Department, Dashpagma.O,

GLOBAL UPDATE (March 1):

- Countries/regions: 223
- Confirmed cases: 114.8 million (in last 24 hours + 416.1 thous)
- Recovered cases: 91.8 million (in last 24 hours + 401.9 million)
- Deaths: 2.5 million (in last 24 hours + 10.3 thous)

Vaccination update:

- Coronavirus immunization has been launched in more than 110 countries around the world.
- 6.5 to 6.7 million people are being vaccinated against coronavirus every day.
- The first results of the vaccine have led to a decline in the number of coronavirus cases reported in some countries around the world, especially in the intensive care and reanimation wards.
- Although vaccines are being introduced, we can only achieve results if we use a combination of public health measures to prevent coronavirus, such as wearing masks, washing hands thoroughly with soap, and keeping a social distance.
- Many scientists around the world warn that the coronavirus vaccine is not the only solution to the counteractions against coronavirus.

NATIONAL, LOCAL UPDATES:

Vaccination update:

- Starting on Feb 23, Mongolia has started the national level vaccination by administering Oxford/AstraZeneca vaccine.
- **As of March 4, 15'432 people were inoculated** through 20 units, which are located at the immunization reference centres and district health centers in UB city.
- It involved about 10,848 people, including health care workers, especially doctors and specialists involved in vaccination against Covid-19, as well as doctors and specialists involved in the response to the infection.
- It also involved more than 3,568 members of the Kovid-19 response team, including inspectors, emergency service officers and police officers.
- Doctors and staff from health service providers in the public and private sectors in Ulaanbaatar city need to contact their affiliated general health centres in their respective districts and intensify vaccinations this week.
- The health service providers with small number of employees, which operate in private sector, can be covered under vaccination by visiting their respective districts.
- The health service providers with large number of employees can make their decision on vaccination internally. Then establish designated vaccination units in their premises, contact with their respective districts and thus intensify vaccination process.
- For companies and organizations that have to continuously operating without interruption, we have set a schedule, issued an announcement, and are organizing vaccinations.
- We would like to urge these organizations to take an active part in vaccination, as the Law on Immunization obliges these types of organizations to vaccinate their employees.
- In the vaccinated population, post-vaccination reactions were observed, and 41% of the vaccinated individuals had normal post-vaccination reactions. These include:
 - 15.5% of all vaccinated people have symptoms of fever
 - 6.5% had symptoms of nausea
 - 6.7% showed signs of deltoid muscle pain
 - 13.2% had inoculated area symptoms
 - 16.4% had headache symptoms
 - 14.4% had symptoms of joint pain
- Thus, reactions after vaccination are normal. In other words, you have these types of reactions that indicate that you are having immunization.
- In addition, no serious complications have been identified and vaccination is proceeding normally.

New cases in a last one day:

- **As of March 5, 13'206 people are covered under the PCR tests**, which is undertaken by laboratories in NCCD, NCZD, NCPH, 1st State Central Hospital, Selenge, Dornod, Dornogovi aimags in the last 24 hours.

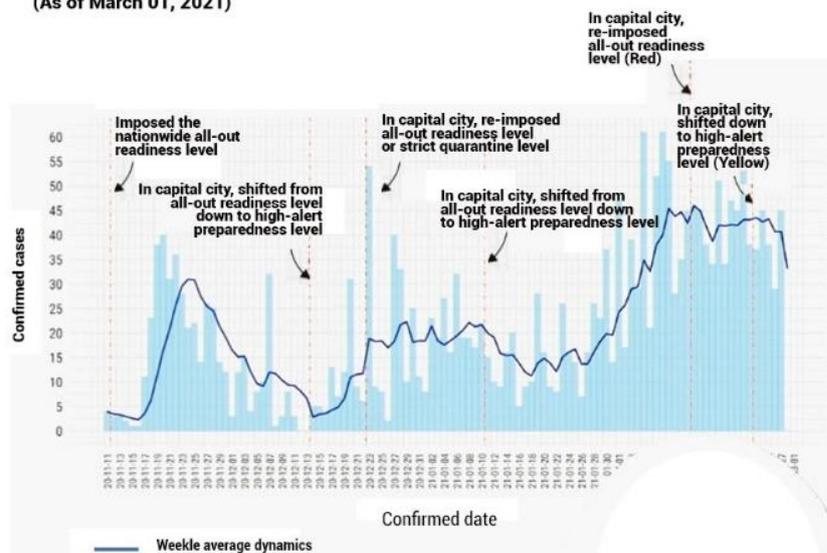

- **The 77 new cases are detected in UB city, of which 71 cases were close contacts** (61 were detected by first tests, 10 were detected by second tests, and sources of 5 confirmed new cases are being traced and surveyed for further clarification.)
- **One new cluster is detected.** The contacts connected with this new cluster are identified and isolated.
- In a last 24 hours, **27 patients are recovered and released to their homes.**
- In terms of 5 confirmed new cases, whose source is being traced and surveyed, here is their geographic locations:
 - Songino-khairkhan district's khoroo # 33, 35, 36.
 - Sukhbaatar district's khoroo # 2.
- **There are currently over 20 Covid-19 clusters in UB city.**
- Keep properly wearing masks and even wearing double masks in public congestion is also suggested.
- Public gathering in large numbers is considered very risky. Therefore, public gathering should be avoided especially during the upcoming "International Women's Day" and "Soldiers' Day".
- Wearing mask is suggested even indoor, in office, in banking, financial service sector, and in public transportation environment. The office with large number of staff must have 10-15 minutes of air ventilation in every two hours and maintain social distancing.

Confirmed total cases in MGL	3153	Locally transmitted total cases:	2634 (+104)	In a last 24 hours

Possibilities of making an appointment of Covid-19 tests:

TAKE A COVID-19 TEST AND CHECK YOUR RESULTS

GEREGE KIOSK
As a citizen, you can go to the Covid-19 menu of the Gerege kiosk, enter your registration number, view and print your test results.

GEREGE WEBSITE
Citizens can log in to eruul.gerege.mn and enter their registration number in the "Get result" section to see the test results. You can also select the "Get an appointment" menu and enter your registration number to get an appointment.

GEREGE APP
As a citizen, you can register in the Gerege app and select "Get an appointment", "View Response", and "Cancel Time" from the "Covid-19" menu.

How to cancel an appointment?
If you want to cancel the test time, you can log in to the Gerege App and go to the "Get an appointment and Check" and "Cancel an appointment" menus and cancel the appointment time.

7777-3773
You can call this phone to get an appointment or cancel an appointment.

MFA update on repatriation

Regulation approved to categorize Mongolia's COVID-19 transmission levels in four colors

- On February 21, Sunday, the cabinet convened for an irregular meeting and approved an interim regulation designed for determining the level of COVID-19 transmission and managing the operations of government organizations, individuals and private legal entities.
- The regulation divides COVID-19 transmission in the country into four levels each represented by a color and lays out detailed rules and guidelines for operations and activities to be carried out by government organizations, individuals and private businesses under each level.
- 1. **Green Level/ everyday preparedness level** – Guidelines for the green level transmission are issued when the country has gone 28 days straight with zero COVID-19 cases. Operations of public and private organizations and individuals are not suspended, only health preventative guidelines and recommendations are in place.
- 2. **Yellow Level/ high-alert preparedness level** – issued when the coronavirus cases registered in the past 14 days are ‘imported’ from abroad and taken under control or the local cases confirmed in the past two weeks are not directly related to each other in terms of their timing and locations. Under the Yellow Level transmission, complete or partial heightened state of readiness is declared and operations of public and private organizations and individuals are restricted to a certain extent.
- 3. **Orange Level/ high-alert preparedness level** – issued when cluster infections are confirmed and local cases recorded in the past 14 days are related to each other in terms of their timing and locations. Under the Orange Level transmission, complete or partial heightened state of readiness is declared and operations of public and private organizations and individuals are restricted to a certain extent depending on the situation.
- 4. **Red Level / all out-readiness level** – issued when large-scale community infections of COVID-19 are recorded, positive coronavirus cases recorded in the past 14 days are found to have been virally transmitted among general population or the cluster source of 25 percent of newly confirmed cases cannot be identified or mortality rate per 10,000 people is higher than 0.1. Under the Red Level transmission, all-out readiness regime is issued in full or partial manners and operations of public and private organizations and individuals are restricted and special measures for lockdown and quarantine are implemented.

- With a view to curb and contain the spread of community transmission of COVID-19, Ulaanbaatar city has been under the Red Level-related regime of strict lockdown since February 11. The lockdown is scheduled to be lifted on February 23, Tuesday, and the capital city will move under the Yellow Level of transmission, reports the Cabinet Secretariat.

<https://montsame.mn/en/read/254384>

Recommendations for organizations and business:

- The business, organizations, legal entities and their administrations need to comply with guidance and recommendations provided by the specialized organizations. They need to make sure their staff and employees' health are maintained, to have them properly wearing masks, disinfecting their hands and office/workplace environment, and to undertake surveillance/observation. If there is any clinical signs immediately inform NCCD and respective agencies.
- **10-15 minutes of air ventilation in offices and homes in every 2 hours is required.**
- Prepare and set-up the isolation room per organization. Do not directly let go your staffs and employees with fever back to their home, from your organizations. Instead, directly isolate him/her in your organization's isolation room prepared in advance.
- **It is recommended to comply with YELLOW state or High-alert preparedness level and its guidance with restricted activities, which are prescribed to all respective organizations, business, legal entities, and individuals. (please refer to the last 2 pages)**
- Hand disinfectants need to be placed at the entrances and other areas.
- Offices and service areas, public areas should be cleaned and disinfected on a regular basis.
- Maintain supplies of liquid hand soaps and regular disinfection and cleaning in toilets/bathrooms
- In offices and service areas, the space should be arranged and adjusted to 4 square meters per person.
- In industrial plants and retail service centres need to assign guard/guides at their entrances to make sure not more than 3 persons enter at a time.
- Support staff & employees immunity and main balanced workload
- Do not hide any infection information & any cases with fever
- The service time for one person in the service area should not exceed 15 minutes.
- As number of selected key entities and organizations are allowed to operate, they need to manage and arrange their office tables/counters as separate and apart from each other.

Recommendations for individuals and households:

- People need to gargle with lemon juice or solutions with soda, salt, and tamedine.
- In order to boost your immune system at your home and office, practice reflexology, which helps your body to secrete interferon naturally.
- 10-15 minutes of air ventilation in offices and homes in every 2 hours is required.
- Always wear masks and gloves, whenever you go outside and wash and disinfect your hands
- Do not get re-infected from your masks, learn how to properly take it off and dispose.
- People should not be purchasing and start stocking many bottles of alcohol and beverages. Alcohol reduces immunity and complicates medical treatment.
- Suspicious cases surveyed under surveillance measure should not hide the truth including information in regards to their close and secondary contacts, places that they have traveled recently, residential address and contact address.
- Those people, who have come in contacts with previous confirmed cases, need to isolate themselves at their home and are obliged not to spread the infection further among public.

Key statistics at national level:

Number of PCR tests:

- 1'855'597 (increased by 19'507 since the last update)

Number of people admitted to diagnostic units:

- 1'748'891 (increased by 24'199 since the last update)

Phone calls:

- 708'474 people in total contacted via seven toll free numbers (119, 1800-0119, 8008-6829)
- (increased by 3'950 since the last update)

People in isolation/quarantine:

- 46'962 in total (increased by 122 in a last 24 hours)

French aid for COVID-19 response handed over

- France, through the European Union, has provided aid worth EUR 54 thousand or MNT 184 million to Mongolia for its response to the COVID-19 pandemic. The timely assistance is of great importance in not only the fight against COVID-19, but also efforts to deliver more oxygen to patients.
- Today March 5, Minister of Health S.Enkhbold, Ambassador Extraordinary and Plenipotentiary of the European Union to Mongolia Traian Laurentiu Hristea, and Ambassador Extraordinary and Plenipotentiary of the French Republic to Mongolia Philippe Merlin have attended the hand-over ceremony of the aid from France and EU.
- During the event, Minister S.Enkhbold voiced pleasure with the steady development of Mongolia-France relations and cooperation in health care, especially the expansion of the partnership between the National Trauma and Orthopedic Research Center of Mongolia and French medical and health organizations, as part of which, French medical professionals have trained Mongolian doctors in modern diagnostic and treatment

approaches for over 20 years and upskilling them in France, supply of much needed hospital equipment, and renovation of intensive- and emergency-care units.

- The Ministry of Health expresses its profound gratitude to EU and France and its people for the assistance, crucial to tackling challenges in the country at this difficult time of a global pandemic.

Oyu Tolgoi LLC pays up MNT 649 billion Tax Act by Mongolian Tax Authority

- After completing an audit of Oyu Tolgoi LLC's 2016-2018 tax returns, the General Department of Taxation – the tax authority of Mongolia, on December 24, 2020, issued a tax claim for a total of MNT 649.4 billion (approximately US\$228 million) that is due to be paid in cash to the Government of Mongolia.
- On February 25, Oyu Tolgoi LLC deposited MNT 229.8 billion to the treasury of the government budget as the first installment to pay for the tax claim. On March 4, the remaining MNT 419.2 billion was paid by Oyu Tolgoi LLC, resulting in full payment for the tax claim by the Mongolian Tax Authority, reports the Ministry of Finance.
- According to the press release issued by the cabinet secretariat on March 5, major violations and breaches identified by the Mongolian Tax Authority's audit were made in 2020.

<https://montsame.mn/en/read/255737>

Eight new cases of COVID-19 detected (Mar 06)

- At today's daily briefing of the Ministry of Health, it was reported that the coronavirus was detected in eight people after testing 24,803 people nationwide within the past 24 hours.
- Five of the newly confirmed cases were recorded in Ulaanbaatar and the other three were passengers who arrived on a charter flight from Istanbul.
- In the past 24 hours, 39 people have been discharged from the hospital, bringing the total number of recoveries to 2,481.

Prime Minister chairs meeting of National Committee on Gender

- On March 5, Prime Minister L.Oyun-Erdene who serves as head of the National Committee on Gender chaired the regular meeting of the committee and heard an assessment report on the impact of implementation of the Law on Promotion of Gender Equality and approved draft action plan of the committee for 2021.
- The committee is agreed to reconvene in May 2021 to update its composition and revise the 2021 work plan.
- At the meeting, the Prime Minister expressed his position that women's participation in decision-making must be accelerated and pledged to focus on policies to increase women's employment in large scale development projects and promote gender equality in each and every field.
- The Prime Minister further reminded that the National Gender Committee must shift from traditional work style and adapt new work methods, style and objectives. Closing the meeting, PM Oyun-Erdene noted that three areas must receive special attention in 2021, which are to completely end torture of women during interrogations, stop sexual harassment in the workplace, starting with government organizations, and ensure women participation for achieving the target to make improvement in the global corruption index.

<https://montsame.mn/en/read/255843>

Prime Minister H.E. Mr. L.Oyun-erdene: I apologize for some of my referenced examples, which may have led to wrong understanding among public

- In connection with Women's Day and for the purpose of having the National Committee on Gender to be convened actively once in every quarter for per annum, as the Prime Minister, I expressed that I would lead that.

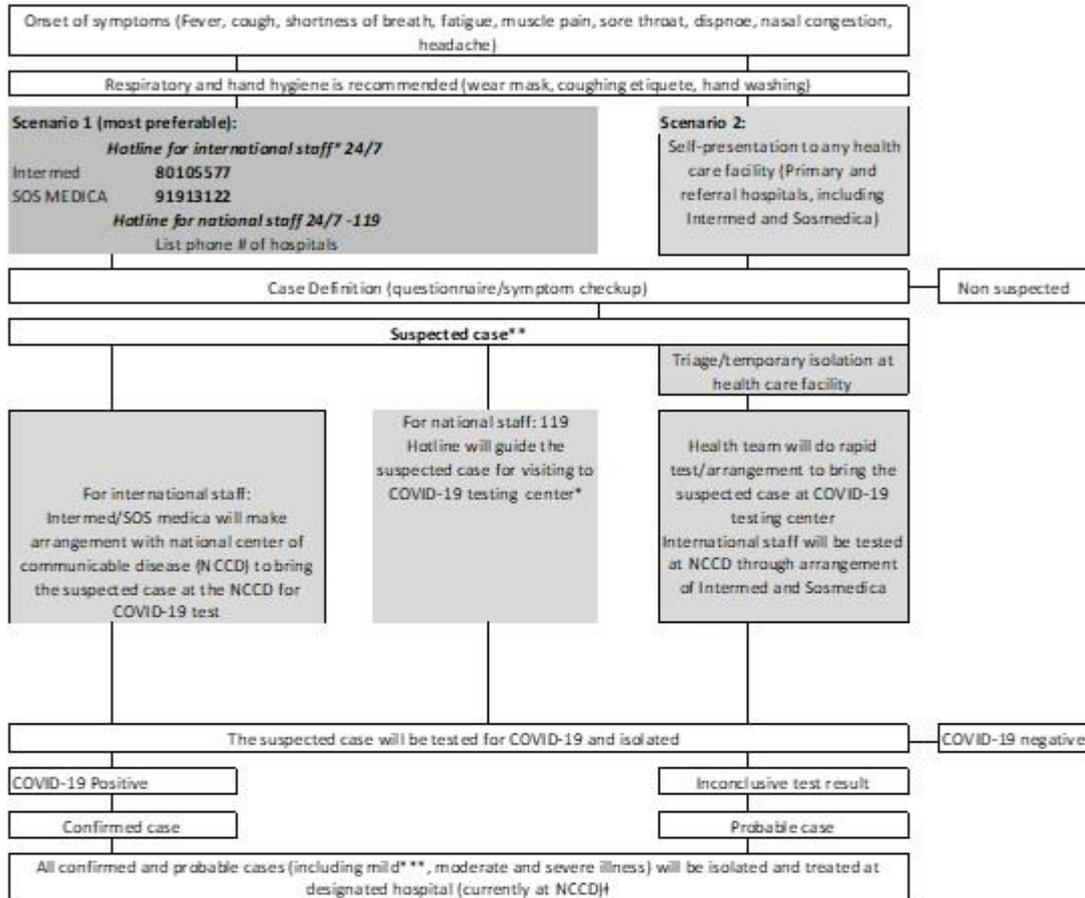

- I realized that one of the things that was being said at that time had led the people to misunderstanding.
- Happy International Women's Day to our women.
- I am sorry if I upset you right before the Women's Day.

Precautionary measures to ALL UN Mongolia staff:

COVID-19 care pathway for UN staff members¹

23 November 2020

*Hotlines for international and local staff members are accessible at UB city and 21 provinces

** If suspected case is in the province, provincial response team is responsible for further care including isolation, treatment at communicable disease ward at province general hospital, and specimen collection, and transportation to designated hospital.

***If all mild cases cannot be isolated in health care facilities, then those with mild illness and no risk factors may need to be isolated in non-traditional facilities, such as repurposed hotels, stadiums or gymnasiums where they can remain until their symptoms resolve and laboratory tests for COVID-19 virus are negative. Alternatively, patient with mild diseases and no risk factors can be managed at home²

† Designated hospitals: /

First: National Center of Communicable Diseases

Second: Military Central Hospital

Third: State Second Central Hospital

1 This pathway could be revised following future update of the interim guidance for COVID-19 surveillance, prevention and response approved by Health Ministerial Order #A269, 29 April 2020.

2 WHO interim guidance. Home care for patients with COVID-19 presenting with mild symptoms and management of their contacts. 13 August 2020.
